Course Descriptions

THE 511 Invitation to Christian Theology –Credit 3 hours

The Christian faith is something people practice. The Church prays, listens to Scripture, celebrates the sacraments, proclaims the Gospel, cares for the suffering, and liberates the oppressed. This is where the task of theology begins. As an invitation to the landscape of Christian theology, this course engages the central issues of Christian theology and teaching. With a Trinitarian focus and refusing to separate the “practical” from the “liturgical” and the “theological,” it invites students to think theologically in ways that demonstrate the relevance of ancient teaching for our world today. The course also hopes to encourage students to live the love that Christian theology proclaims.

CHH 511 History of Christianity –Credit 3 hours

This course highlights major developments in the history of Christianity from the end of the first century CE to the present. Students are challenged to think historically about Christianity’s past and glean insights which can help ministers and congregations pursue their callings more effectively.

MIS 511 Foundations in Christian Mission –Credit 3 hours

This course investigates biblical and theological foundations of mission and evangelism, and examines practices throughout the history of the Christian church and today. Students will learn the history of mission practice, and recurring patterns, themes, and ethics in mission. The goal of this course is to help each student: (1) engage in mission and evangelism with integrity and sensitivity, and (2) support discernment and practice of mission and evangelism in a variety of ministry and church settings.

PCC 623 Pastoral Care and Counseling with Addicted Persons and Their Families –Credit 3 hours

This course is designed to investigate substance abuse problems from selected perspectives of family systems, personality theories, addictions psychology, culture, and biblical/theological foundations. Students will be requested to look at their own thoughts, beliefs, and practices in these areas in order to consider applications for pastoral care and counseling with addicted persons and their families.

MIS 505 The Biblical Theology of Missions–Credit 3 hours

A study of the principal texts of the Old and New Testaments dealing with the missionary purpose of God in human history and the role of the People of God in that purpose. Through a study of the biblical text and models, as well as through exposure to a segment of current literature in the field of study, we will seek to develop both our theology and practice of mission.
